Massachusetts Risk and Insurance Management Society, Inc.

Congratulations Ronald Mariano

The public and the insurance industry alike are well served by Ronald Mariano's leadership in the House of Representatives. It is for this reason that he has been selected as the winner of the 2008 Insurance Library Insurance Professional of the Year Award.

Ronald Mariano works collaboratively to devise ways in which to better help the public he serves, while genuinely listening to the views of leaders in the insurance industry. Ron readily recognizes the help and support he has received from several mentors in various branches of the industry, some of whom are previous winners of this award.

For almost a decade, Ronald Mariano has been working in his capacity as a representative to help further insurance in Massachusetts. Among other achievements, he was a key architect in the Health Care Reform Act of 2006. This Act brought Massachusetts to the forefront of the Universal Healthcare debate as people all over the country watched and continue to watch to see how the system develops.

We express our sincere congratulations to Ronald Mariano as he receives this award!
